ABOUT US

RASS Associates Ltd is a premier construction and facilities management company based in Bangladesh, renowned for its unwavering commitment to excellence and its extensive experience in delivering large-scale, complex projects. With nearly decades of experience in the industry, RASS Associates Ltd has built a reputation for transforming client visions into reality, managing projects from initial conceptualization through to completion, and maintaining the highest standards of quality and service throughout the project lifecycle.

We pride ourselves on being a versatile player in the construction sector, with a diverse portfolio that spans a wide array of industries. Our expertise covers residential, commercial, industrial, and infrastructure projects, making us a go-to partner for clients seeking reliable, innovative, and cost-effective solutions. Whether it's a multi-story office building, a luxury residential complex, a power plant, or public infrastructure like roads and bridges, RASS Associates Ltd has consistently delivered projects that exceed expectations.

Location Map:

Our Commitment:

We are committed to delivering projects on time, within budget, and with the highest quality standards. Our vision is to be the preferred partner for clients, setting benchmarks for others to follow.

Mission

Our mission at RASS Associates Ltd is to consistently exceed our client's expectations by delivering high-quality construction services. We achieve this through a strong commitment to teamwork, fostering a culture of collaboration and mutual support among our professionals, clients, and partners. We prioritize innovation in every phase of our work, from design to execution, ensuring that our solutions are always ahead of industry trends. Above all, we emphasize safety and sustainability in every aspect of our operations. Our mission is not only to meet the immediate needs of our clients but to build enduring relationships based on trust, reliability, and exceptional performance.

Vision

Our vision is to be the market leader in construction and facilities management in Bangladesh. We aim to be recognized not just for our excellence in project execution but also for our commitment to sustainability, innovation, and client satisfaction.

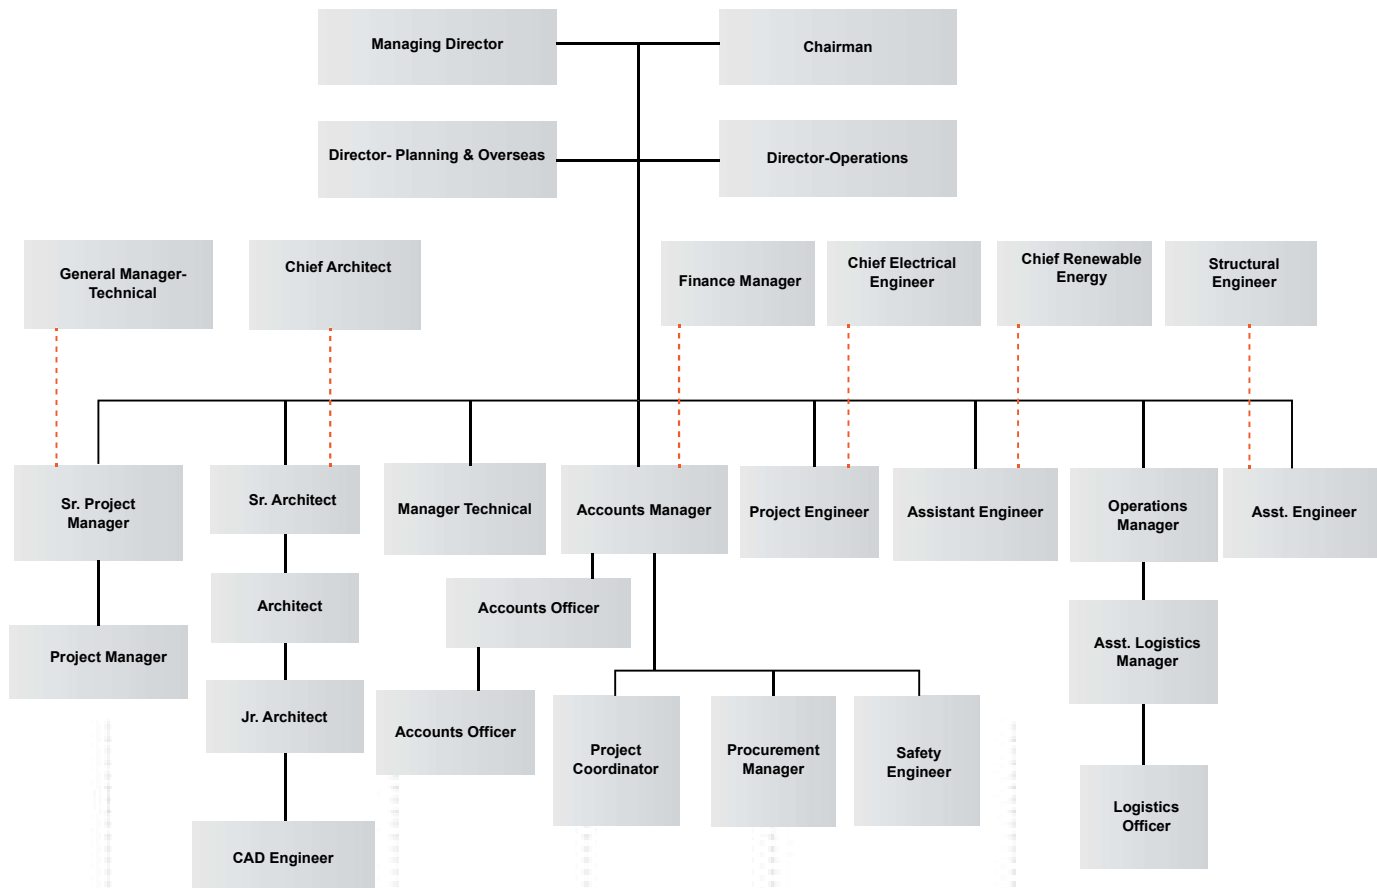

Core Values:

- **Excellence:** We aim to surpass industry standards with a focus on health and safety, environmental sustainability, and quality.
- **Collaboration:** We believe in fostering collaboration at all levels for shared success.
- **Innovation:** Continuously embracing new technologies and methods for enhanced project delivery.
- **Integrity:** We operate with honesty, respect, and ethical practices.
- **Discipline:** We believe in a proactive approach to solving challenges and ensuring seamless execution of projects.

Meet Our Team

Chairman

Nasim Jahan is a promising women entrepreneur with over 25 years of business experience. She completed her studies in Sociology at Dhaka University and has since dedicated her career to entrepreneurship and organizational leadership. Since 2017, she has been serving as the Chairman of RASS Group, where she has played a pivotal role in steering the company's growth and diversification across multiple sectors. Under her leadership, RASS Group has expanded its footprint in construction, manufacturing, and consultancy services, contributing significantly to the local economy. She is widely respected for her vision, resilience, and ability to inspire teams, making her a role model for aspiring women entrepreneurs in Bangladesh.

Managing Director

Mr. Md. Shah Alam is a goal-driven and dynamic professional with over 33 years of distinguished experience in national and multinational organizations. He previously worked at OTOBI and then Tullow (now Krish Energy), where he served as Finance Director for more than a decade. Beginning his career in finance and senior leadership, he later transitioned into entrepreneurship and now serves as the Managing Director of RASS Associated Limited, RASS Agriculture Limited, RASS Resort, NRL Eco Bricks Limited, Arctic Tern Limited, and F7 Doors Limited. He possesses extensive expertise in Construction & Infrastructure, Production of Construction & Building Materials, Agriculture & Agro-processing, Hospitality & Tourism, and Manufacturing, while also working closely with international EPC contractors in the energy and power sector. His strong leadership and ability to manage large-scale operations have enabled him to drive sustainable business growth across diverse industries. Mr. Alam holds a Master's in Commerce (Marketing, 1992) and an MBA in Accounting & Information Systems (2005) from the University of Dhaka, and is actively engaged in professional and academic associations as Member of the Bangladesh Algeria Business Forum (BABF), President of Matibhanga Degree College, Life Member of the Marketing Alumni Association (University of Dhaka), Life Member of the Dhaka University Alumni Association, and Life Member of the DU-MKT-20 Foundation.

Meet Our Team

**Director of
Planning &
Foreign Affairs**

Mr. Sharif Sadi, Director of Planning & Foreign Affairs at RASS Group, brings over 23 years of experience in the hospitality industry across Bangladesh and abroad. With expertise in strategic planning, international relations, and operational excellence, he has held leadership roles in renowned organizations. At RASS Group, he drives strategic initiatives and fosters global partnerships to support sustainable growth and expand the group's international presence.

**GM-Sales &
Marketing**

Mr. Reaz Ahmed, MBA and M.Com in Marketing from the University of Dhaka, is a seasoned sales and marketing professional with over 30 years of experience. He previously served as Head of Sales at Partex Star Group, leading multiple business verticals and driving revenue growth, market expansion, and brand development. With senior leadership roles in both national and multinational organizations, he brings expertise in sales strategy, business development, and team leadership, consistently delivering sustainable growth and operational excellence.

GM-Production

Mr. Md. Azizur Rashid, M.Sc. in Applied Chemistry and Chemical Engineering from the University of Dhaka, is a seasoned production and operations expert with over 30 years of experience in particle board, plywood, and furniture manufacturing. As General Manager (Production/Operations) at Star Particle Board Mills Ltd, he has optimized manufacturing processes, enhanced efficiency, and ensured product quality. With senior roles at T.K. Group and Partex Star Group, he brings expertise in production planning, process automation, quality control, and supply chain optimization to drive sustainable manufacturing excellence.

Meet Our Team

**GM-Corporate
Sales**

Mr. K.M. Iftekhar Uddin Khan, MBA in Marketing and MA in History, is a seasoned sales and marketing professional with over 30 years of experience in corporate sales, business development, and strategic marketing. As Former Head of Corporate Sales & Door Business at Star Particle Board Mills Ltd., Partex Star Group, he drove nationwide sales growth, managed high-value corporate accounts, and expanded market reach. He brings strong expertise in sales strategy, client relationship management, and team leadership to deliver sustainable growth and business expansion.

GM-Operations

Mr. Mohaiminur Rahman is an accomplished business leader with over 20 years of experience in FMCG, building materials, and engineering products. As Head of Sales & Operations at Partex Star Group, he led cross-functional teams, optimized operations, and drove revenue growth. He brings expertise in strategic planning, sales management, business process optimization, and team leadership to deliver sustainable growth and operational excellence.

Chief Architect

Mr. Syed Mobashwer Hossain, Bachelor of Architecture from BUET, Dhaka, is the Chief Architect with over 30 years of experience in architecture, design, and project supervision. He has led high-profile projects in Bangladesh and abroad, including power plants, infrastructure, housing, and commercial facilities. With expertise in architectural design, master planning, and project execution, he delivers innovative, sustainable, and high-quality solutions.

Meet Our Team

**GM-Technical**

Mr. Md. Badiruzzaman Mollah, BEng in Civil Engineering from BUET, Dhaka, is a civil engineering and construction expert with over 31 years of experience. As General Manager – Technical at RASS Associates Ltd., he leads engineering teams and oversees large-scale projects, including JV developments, hospitals, mosques, and infrastructure works. With deep expertise in project management, structural design, estimation, and site supervision, he delivers safe, timely, and cost-effective construction solutions across Bangladesh and the UAE.

**DGM-Technical**

Mr. Md. Farhadul Osmany Riktan, a BUET graduate with an M.Sc. in Bionics from Germany, is an experienced engineer with over a decade in project management, heavy lifting, and transportation across multiple industries. He has contributed to international projects with Siemens, Chevron, and ExxonMobil in Germany, Singapore, Indonesia, Malaysia, Saudi Arabia, and Bangladesh. With expertise in machine integration, industrial automation, and engineering simulations, he delivers efficient, safe, and cost-effective project execution.

Message from Managing Director

At RASS Associates Ltd, we take immense pride in being one of Bangladesh's leading construction and facilities management companies. With nearly decades of experience in the industry, we have successfully established ourselves as a trusted partner for a wide range of projects across various sectors. From residential and commercial developments to industrial and infrastructure projects, we are committed to delivering exceptional results that exceed our clients' expectations.

Our journey has been one of continuous growth, driven by our unwavering dedication to excellence. We firmly believe that quality, innovation, and sustainability are the cornerstones of every successful project. Whether we are constructing a high-rise building, developing a power plant, or maintaining critical infrastructure, we approach each task with the same level of passion, precision, and professionalism.

At RASS Associates, we prioritize collaboration at every level of our organization, from our engineers and architects to our project managers and construction teams. We work hand-in-hand with our clients to understand their unique needs, challenges, and objectives, ensuring that each project is tailored to meet those requirements. We recognize that the client's vision is integral to the success of every project, and we go above and beyond to bring that vision to life, on time and within budget.

However, our work goes beyond just completing projects. We are dedicated to ensuring the long-term success of every asset we manage. Our facilities management and asset management services are designed to ensure that our clients' properties remain in excellent condition throughout their lifespan, offering optimal performance and sustainability.

Above all, safety and sustainability are central to everything we do. We adhere to the highest standards of health, safety, and environmental responsibility in all our operations. Our goal is not only to deliver high-quality projects but also to do so in a way that is responsible and beneficial to the environment and the communities we serve.

Md Shah Alam
Managing Director
RASS Associates Ltd.

Our services

RASS Associates Ltd is a full-service construction and facilities management company, offering a comprehensive suite of services to meet the needs of our diverse clientele. With a strong focus on quality, efficiency, and innovation, we ensure that every project we undertake is executed to the highest standards. Below is an in-depth look at the core services we offer:

1. Civil Construction

RASS Associates Ltd has built a reputation for successfully managing construction projects of all sizes, ranging from residential buildings to large-scale industrial complexes.

- **Residential Buildings:**

We specialize in the construction of luxury apartments, villas, dormitories, and staff accommodations, all designed with the client's vision and comfort in mind.

- **Industrial Projects:**

RASS Associates Ltd has extensive experience working on factories, warehouses, power plants, and commercial complexes. We manage large-scale industrial projects with efficiency and precision, leveraging modern construction techniques to meet the unique requirements of each sector.

- **Project Management:**

From concept to completion, we oversee all aspects of the construction process, including scheduling, budgeting, site management, and quality control.

2. Civil Engineering

RASS Associates Ltd is recognized for its civil engineering expertise, particularly in the design and execution of complex infrastructure projects. Whether it's building roads, bridges, or industrial facilities, our engineers use advanced techniques and technologies to create efficient, sustainable, and reliable solutions.

- **Infrastructure Design & Execution:**

We specialize in large-scale projects such as road construction, rail systems, sewer systems, and utilities networks. Our team ensures that each infrastructure project is well-integrated into the existing landscape, focusing on long-term sustainability and community benefit.

- **Structural Engineering:**

RASS Associates Ltd's structural engineering team excels at designing structures that are strong, durable, and cost-effective. From high-rise buildings to large industrial structures, we ensure the safety and reliability of all the projects we undertake, meeting national and international codes.

- **Environmental Impact Assessments:**

We conduct comprehensive environmental studies to assess and mitigate the impact of our projects, ensuring compliance with sustainability standards and regulations. This includes considering the ecosystem, local community, and natural resources during the design and planning phases.

3. Property Development

Our property development services cover every phase of a real estate project, from initial land acquisition to post-construction services, including leasing and asset management. We specialize in creating properties that meet market demand while providing sustainable returns for investors.

- **Real Estate Development:**

We manage all aspects of the development process, including identifying potential sites, feasibility studies, land acquisition, design, and construction. Whether residential, commercial, or mixed-use, we deliver developments that align with market trends and the needs of the community.

- **Project Financing & Consultancy:**

We assist clients in securing financing for development projects and provide consultation on project planning and implementation. We work closely with financial institutions and investors to ensure that projects are economically viable and provide high returns on investment.

- **Post-Construction Services:**

After project completion, RASS Associates Ltd continues to provide maintenance services, tenant management, and facility management to ensure that the property remains in excellent condition and meets the long-term needs of tenants or owners.

4. Asset Management

RASS Associates Ltd offers comprehensive asset management services, ensuring that residential, commercial, and industrial properties are maintained and managed effectively throughout their life cycle. Our facility management team works to ensure that your investment retains its value and remains functional.

- **Property Maintenance:**

We provide regular preventive maintenance to ensure that building systems, including HVAC, plumbing, and electrical systems, are always in optimal condition. Our team handles routine inspections, repairs, and replacements, addressing issues before they become costly problems.

- **Energy Management:**

As part of our asset management services, we focus on energy efficiency and sustainability. We help clients reduce their operating costs by implementing energy-saving initiatives, smart building technologies, and environmentally-friendly practices.

- **Leasing & Tenant Management:**

For commercial properties, we manage tenant relationships, including lease renewals, rental payments, and service requests. Our goal is to maximize the profitability and functionality of properties while maintaining positive relationships with tenants.

5. Bridging & Structural Engineering

Our bridging & structural engineering services focus on designing, constructing, and maintaining safe and reliable bridges and other critical infrastructure. RASS Associates Ltd's structural engineers specialize in designing custom solutions for both road bridges and rail bridges, ensuring that they meet both technical and environmental requirements.

- **Bridge Design & Construction:**

RASS Associates Ltd's team designs and builds various types of bridges, including I-beam bridges, arch bridges, suspension bridges, and precast concrete structures. We incorporate the latest engineering techniques and materials to enhance the structural integrity and longevity of our projects.

- **Structural Analysis:**

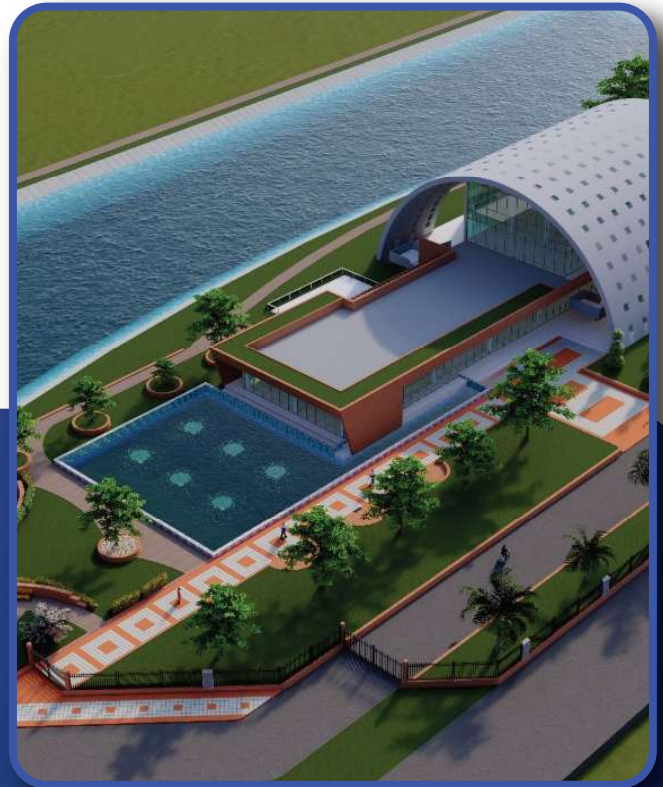

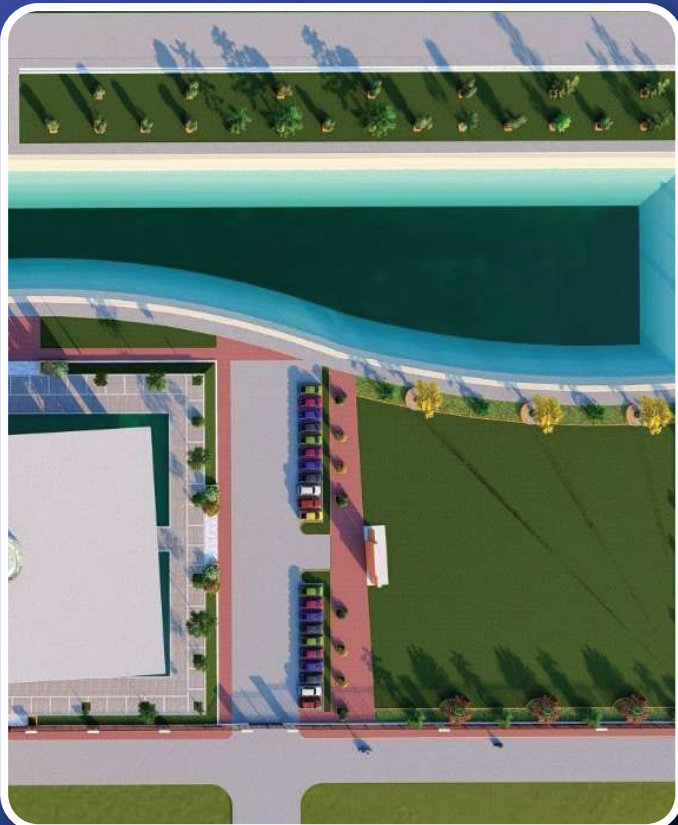

Our team conducts thorough structural analysis and site assessments to determine the feasibility and best approach for each project. We factor in load-bearing capacity, environmental conditions, and traffic demands to deliver durable and cost-effective solutions.

6. Landscaping

At RASS Associates Ltd, we understand the importance of creating functional and aesthetic outdoor spaces. Whether it's for residential properties, commercial complexes, or public spaces, our landscaping services provide customized solutions that enhance the visual appeal and functionality of the environment.

- **Soft Landscaping:**

Our soft landscaping services include planting, lawn care, garden design, and the development of natural elements like water features and green spaces. We select plants that thrive in the local climate, creating beautiful and sustainable landscapes.

- **Hard Landscaping:**

We also provide hard landscaping solutions, such as patios, walkways, retaining walls, and fencing. Our team uses durable materials to ensure that hard landscaping elements are functional and aesthetically pleasing.

7. Road & Pavement

RASS Associates Ltd is highly skilled in the construction, repair, and maintenance of roads and pavements, providing durable, safe, and sustainable infrastructure solutions.

- **Road Construction & Repair:**

We offer comprehensive services in road construction, including site preparation, asphalt paving, drainage, and curb installation. Our team ensures that the roads are built to last and can withstand heavy traffic and environmental conditions.

- **Pavement Services:**

From sidewalks to parking lots, we construct high-quality pavements that are designed for heavy usage while maintaining a smooth, safe surface. Our pavement repair services ensure the longevity of existing infrastructure.

8. Dredging & Excavating

RASS Associates Ltd provides specialized dredging and excavating services essential for land development, coastal restoration, and marine projects. To develop a balanced and cost-effective transport system in Bangladesh, we recognize the paramount importance of comprehensive capital and maintenance dredging programs. By addressing the critical challenges of maintaining navigable waterways and managing floods, RASS Associates aligns its operations with the Government of Bangladesh's Delta Plan 2100

OUR MISSION

We aim to deliver reliable, efficient, and environmentally responsible dredging solutions across Bangladesh's inland waterways. Our goal is to contribute to the restoration of navigable rivers, support sustainable waterway infrastructure, and drive the economic development of the nation. We are committed to making major rivers navigable year-round, retrieving the accessibility of river transportation.

OUR VISION

Our vision is to provide an exceptional experience to our clients and act as an indispensable partner. We strive to become one of Bangladesh's most trusted and technically capable dredging entities. We aim to drive the revitalization of the country's river network and enable sustainable growth through world-class dredging expertise

CORE SERVICES

RASS Associates Ltd delivers a comprehensive range of specialized dredging and marine civil works, tailored specifically to meet both public sector mandates and private development goals.

- **Capital & Maintenance Dredging:** We execute targeted excavation of silt and accumulated sediments from riverbeds, navigation channels, and inland waterways to re-establish design draft depths and ensure uninterrupted vessel transit.
- **Land Reclamation & Hydraulic Filling:** Utilizing recovered dredged materials, our operations perform hydraulic backfilling to raise low-lying land, construct sturdy flood embankments, and prepare site foundations for major infrastructure developments.
- **Riverbank Protection & Anti-Erosion:** We implement engineered bank stabilization and slope protection measures to combat severe riverbank erosion, safeguarding vulnerable communities, agricultural land, and marine infrastructure.
- **Hydrographic & Bathymetric Surveying:** Our team conducts advanced bathymetric soundings and spatial riverbed mapping to analyze water depths, track bed morphology, and accurately model volume requirements prior to and following dredging works.
- **Marine Construction Support:** We provide essential dredging, underwater trenching, and earthwork assistance for heavy civil engineering projects, including bridge foundation preparations, sub-river transmission line crossings, and port facilities.
- **Dredger Rental & Management Services:** We supply heavy-duty dredgers, auxiliary support craft, and discharge piping on flexible rental terms or full-service operational management, complete with certified marine crews and on-site technical support.

State-of-the-Art Dredging Fleet & Equipment

Our heavy-duty dredging fleet is equipped for trenching, navigation channels, and harbor operations.

Cutter Suction Dredgers (CSD)

- 22-Inch CSD 550: Capable of dredging up to 15 meters in depth and discharging material up to 2,000 meters away. It features a 600 mm suction pipe, a 550 mm discharge pipe, and is powered by high-performance Caterpillar engines (1270 kW dredge pump engine).
- 20-Inch CSDs Each vessel has a maximum dredging depth of 15 meters, a 508 mm suction pipe diameter, and a total installed power of 1788 kW. They feature fully automated, centrally controlled dredging processes.

Marine Support Vessels

- Workboats: We operate three 12-meter workboats equipped with twin 200hp diesel engines, navigational equipment (Radar, Gyro, Auto Pilot), and off-ship firefighting systems.
- Houseboats: We deploy three 16-meter houseboats, each capable of accommodating 26 personnel, ensuring our crews can operate continuously in remote riverine locations.

Pipeline and Accessories

Our discharge infrastructure includes 720 pieces of 500mm inner-diameter HDPE pipes, 150 pieces of heavy-duty rubber hoses, and 240 pairs of floaters to support long-distance spoil discharge.

Major Completed Projects

RASS Associates Ltd has built a strong operational track record executing high-volume capital dredging, hydraulic earthworks, land development, and shore protection for critical power generation, infrastructure, and water resources projects across Bangladesh.

1. Payra 1320MW Thermal Power Plant Project (Water Intake Area Dredging)

- **Project Scope:** Hydraulic Dredging & Sediment Removal for Cooling Water Intake System.
- **Key Deliverables:**
 - Executed specialized suction-type hydraulic dredging in the high-tidal Andharmanik Riverbed to clear deposited silt and sediment.
 - Protected the primary water supply for the power plant's cooling towers, preventing potential pipeline blockages and operational shutdowns.
 - Deployed floating hydraulic dredging units, pump machines with high-pressure water jet loosening nozzles, floating pontoons, and specialized dive teams for underwater bed clearing.

2. Sirajganj 68MW Solar Power Plant Project

- **Project Scope:** Comprehensive Land Reclamation, Hydraulic Dredging, and Site Development.
- **Key Deliverables:**
 - Executed large-scale riverbed cutter suction dredging from the adjacent Jamuna river area to source fill material for site elevation.
 - Carried out hydraulic land filling and compaction over low-lying ground to achieve structural load-bearing capacity required for utility-scale solar arrays.
 - Completed land development and leveling works to establish a flood-safe foundation for the installation of the solar park's structural foundations, central inverters, and sub-station facilities.

Major Completed Projects

3. Modhumati 100MW HFO Power Plant Project

- **Project Scope:** Dredging, Hydraulic Land Filling, Land Development, Shore Protection & Anti-Erosion Works.
- **Key Deliverables:**
 - Performed capital dredging and hydraulic filling to reclaim, elevate, and stabilize the power plant project boundary against regional flood elevations.
 - Designed and executed heavy bank stabilization, shore protection, and anti-erosion measures along the riverfront to prevent soil loss and counter hydraulic scour.
 - Delivered fully developed, leveled ground infrastructure and revetment works to secure long-term protection for heavy power-generation machinery and riverine intake systems.

4. Payra Port 1st Terminal Road Project (Dredged Sand Filling Works)

* **Project Scope:** Supply, hydraulic dredging, transportation, and filling of dredged sand for the Payra Port 1st Terminal Road Project.

* **Key Deliverables:**

1. Executed large-scale dredged sand filling works for the construction of the Payra Port 1st Terminal Road.
2. Supplied and placed approximately 5 crore cubic feet (CFT) of dredged sand meeting the specified fineness modulus (FM 0.50–0.80) and quality requirements.
3. Performed loading, hydraulic transportation, unloading, and placement of dredged sand while complying with project specifications and joint measurement procedures.
4. Successfully supported the development of critical port infrastructure by providing engineered land filling works for terminal road construction.

Our Projects (Completed & Ongoing)

Completed Projects

Payra 1320MW Thermal Power Plant Project

The Payra 1320MW Thermal Power Plant is located in Dhankhali Union, within the Kalapara Upazila of Patuakhali District in southern Bangladesh. This project is owned by Bangladesh China Power Company Ltd. (BCPCL), a joint venture between North-West Power Generation Company Limited (NWPGL) and China National Machinery Import and Export Corporation (CMC).

Completed Works at Payra 1320MW Thermal Power Plant Project:

RASS Associates Ltd. has successfully completed a wide range of critical construction and infrastructure works, including:

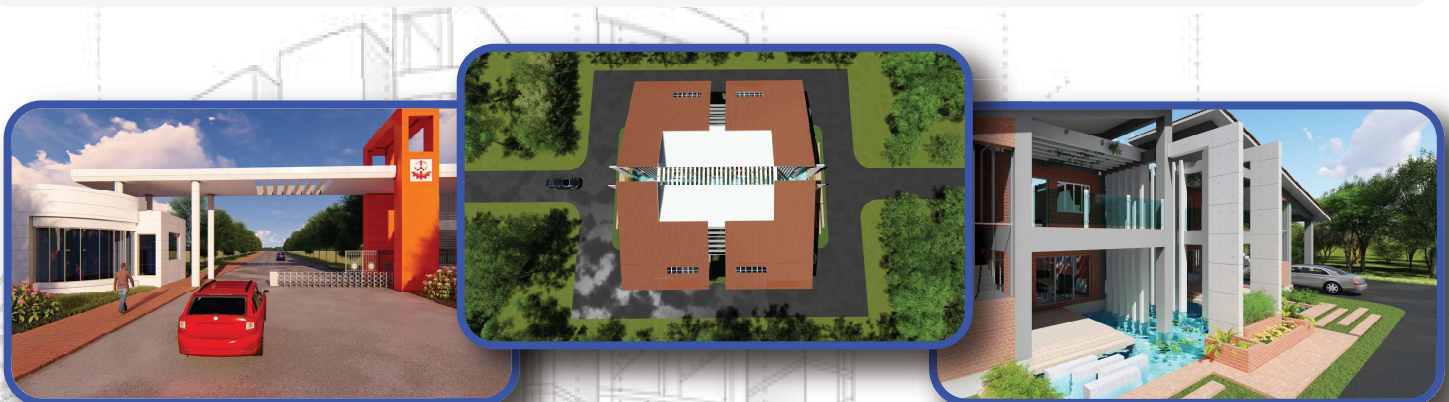

- Design and Construction of a Two-Story Police Barrack Building
- Renovation and Landscaping of the VIP Rest House
- Design and Construction of a VVIP Rest House Building with Helipad
- Design and Construction of Eight Five- and Six-Story Staff Quarter Buildings
- Construction of a Swimming Pool, including Lighting and Heating Systems
- Construction of Roads, Drainage Systems, Parking Areas, and Water Bodies
- Design and Construction of Three Six-Story Officers' Dormitory Buildings
- Design and Construction of Five Five-Story Staff Dormitory Buildings
- Supply of Fittings, Fixtures, Furniture, Equipment, and Other Items for All Buildings

- Construction of a Three-Story Cyclone Shelter Building
- Design and Construction of Connecting Roads and Drainage Systems
- Design and Construction of the Main Gate with Landscaping
- Renovation of 27 Labor Sheds at the Payra Power Plant
- De-silting Work
- Construction of an Inauguration Plaque
- Construction of a Recreation Zone, including a Health Club, Swimming Pool, Basketball and Tennis Courts, Kids Zone, etc.
- Construction of a Central Cafeteria

In addition to the above-mentioned tasks, RASS Associates Ltd. has been awarded several other important works including:

- Grass Cutting and Cleaning Services
- Provision of School Furniture for Bangladesh China Technical Institute
- Repairing and Painting of Boundary Walls
- Installation of Barbed Wire Fencing
- Painting of Walls and Staircases
- Supply of Spotlights, Garden Lights, and Other Electrical Items
- Supply and Installation of Pavement Works for Landscaping of VIP Rest House
- Design and Construction of an Inauguration Plaque for the Madhumati Power Plant
- Dredging and Filling Sand at the Payra Port 1st Terminal Road Project under Payra Port Authority as a Subcontractor
- Construction of Shahid Minar at the Premises of Bangladesh-China Technical Institute (BCTI)
- Supply of Ready-Mix Concrete (30 Grade, 500 CM)
- Beautification of Entrance Gate
- Engineering Procurement and Construction (EPC) of Lubricant Blending Factory
- Renovation of OD and SD Buildings

Completed Civil Works for the 64 MW Pabna Solar Power Project

The following infrastructure and civil construction works were successfully completed as part of the **64 MW Pabna Solar Power Project**:

- Construction of the internal reinforced cement concrete (RCC) boundary wall.
- Construction of a five-storey officers' residential dormitory building.
- Construction of a four-storey staff dormitory building.
- Construction of the Ansar barrack and security accommodation building.
- Construction of the project rest house.
- Construction of all internal RCC roads.
- Installation of the complete drainage system.
- Landscaping and site development works.
- Construction of the main entrance gate.
- Construction of the sewage treatment plant (STP).
- Installation of the water supply and sanitation system.

Health, Environment, and Safety Policy (HES)

RASS Associates Ltd. is committed to providing a safe, healthy, and environmentally responsible workplace. This Health, Safety, and Environmental (HSE) policy outlines our commitment to health and safety, environmental sustainability, and continuous improvement in all our operations.

1. Health and Safety Commitment

We are dedicated to ensuring the health and safety of our employees, contractors, clients, and all stakeholders. Our goal is to prevent accidents and injuries through proactive measures and continuous training.

Risk Management: Regular risk assessments will be carried out, and control measures will be implemented to mitigate identified risks.

Training and Awareness: All employees will receive regular safety training and participate in emergency drills to ensure preparedness.

Incident Reporting and Investigation: Any incidents or near-misses will be thoroughly investigated to prevent recurrence and ensure continuous improvement.

2. Environmental Management

We recognize the importance of environmental sustainability in our construction and operational activities. Compliance with Regulations: RASS Associates Ltd. will comply with all local environmental laws and regulations.

Sustainability Initiatives: We will minimize environmental impact through energy-efficient practices, waste reduction, and the use of sustainable materials.

Waste Management: Waste generated on-site will be managed responsibly, with an emphasis on recycling and proper disposal.

3. Responsibilities

Management: Senior leadership will allocate resources, ensure compliance, and promote a strong HSE culture.

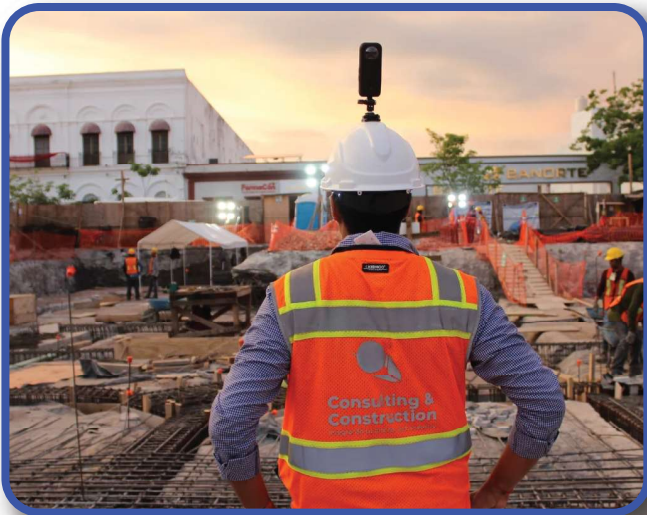

Employees: All employees are expected to adhere to safety protocols, report hazards, and participate in safety training and meetings.

Contractors and Subcontractors: Must comply with RASS Associates Ltd.'s HSE policies and follow established safety guidelines.

4. Emergency Preparedness

We are committed to ensuring that emergency response plans are in place for all potential risks. These plans will be reviewed regularly, and all personnel will participate in emergency drills, ensuring an effective response in any situation.

6. Commitment to Excellence

At RASS Associates Ltd., health, safety, and environmental protection are fundamental to the success of our projects. Through adherence to this policy, we aim to exceed industry standards, ensuring the well-being of our people, clients, and the environment.

5. Monitoring and Improvement

Performance Monitoring: We will regularly assess HSE performance through audits, inspections, and reviews to ensure compliance and identify areas for improvement.

Continuous Improvement: Feedback from employees and contractors will be actively sought to improve HSE standards across all operations.

Corporate Social Responsibility (CSR)

At RASS Associates Ltd., we are committed to making a positive impact on society and the environment. Our CSR policy reflects our dedication to ethical business practices, sustainability, and community development.

1. Commitment to the Community

We support local communities by:

- Providing charitable donations and supporting educational programs and healthcare initiatives.
- Creating economic opportunities through local hiring and skills development.

2. Environmental Sustainability

We aim to minimize our environmental footprint by:

- Implementing sustainable construction practices, using energy-efficient materials, and promoting green building designs.
- Reducing waste and focusing on recycling during all phases of construction.

3. Employee Engagement

We prioritize the well-being and development of our employees by:

- Offering a safe and healthy working environment and career development opportunities.
- Promoting diversity and inclusion within our workforce.

4. Ethical Business Practices

We uphold the highest standards of integrity and transparency:

- Adhering to fair trade practices and ensuring anti-corruption measures are in place.

5. Focus Areas

Our CSR efforts focus on:

- Education: Supporting schools and providing scholarships.
- Healthcare: Funding medical outreach programs.
- Disaster Relief: Assisting communities during natural disasters.

6. Monitoring and Reporting

We ensure the effectiveness of our CSR initiatives by:

- Regularly reporting on the outcomes of our activities.
- Continuously seeking feedback to improve our CSR efforts.

NRL ECO BRICKS

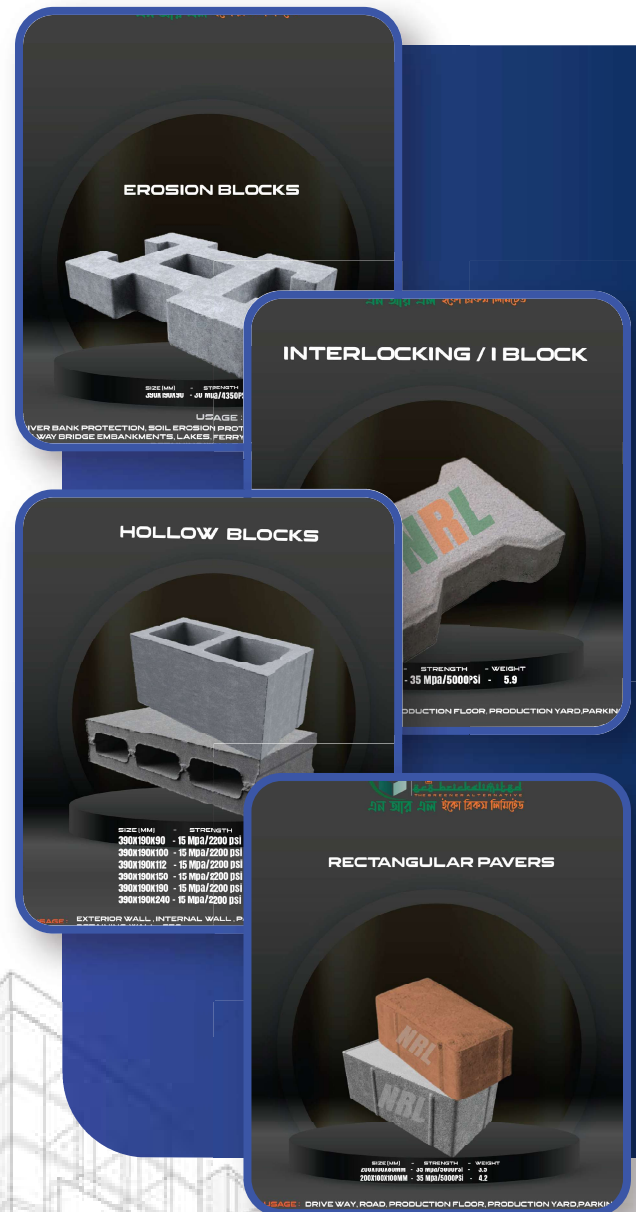

THE GREENER ALTERNATIVE

NRL ECO BRICKS LIMITED is a leading manufacturer of eco-friendly block products, committed to both environmental preservation and customer satisfaction. We stand out in the market by offering high-quality products at competitive prices, backed by a strong promise of timely delivery.

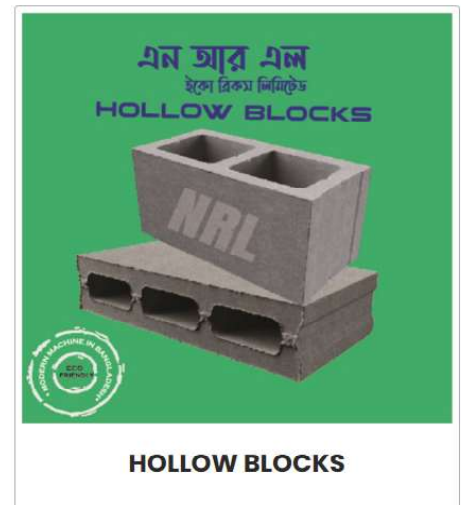

Our commitment to excellence is reflected in our use of state-of-the-art German technology, which ensures we meet the highest global standards. We also meticulously select the best raw materials available in the country, believing that a superior product begins with a solid foundation.

Situated on a 20,000-square-meter factory in Gazipur, we have a significant production capacity of 100,000 blocks per day. This allows us to handle projects of any scale while maintaining our dedication to innovation and sustainability. We are not just making blocks; we are contributing positively to the ecological well-being of our planet, all while aiming to exceed the expectations of our customers.

PRODUCT FEATURES

DESIGN FLEXIBILITY: Another advantage of using concrete blocks is its flexibility as a building material. Concrete blocks can be used to build any type of housing feature, columns, archways and other intricate designs. The construction material caters to every need and home requirement.

STRENGTH

PRODUCT	CRUSHING STRENGTH
HOLLOW BLOCK	15-25 MPa
SOLID BRICKS	15-25 MPa
UNI PAVERS	25-40 MPa
INTERLOCKING P BLOCK	25-40 MPa
RECTANGULAR PAVERS	25-40 MPa
KERB STONE - K9	20-35 MPa
PLUNK - K4	20-35 MPa
EROSION BLOCK	20-35 MPa

CONCRETE BLOCKS

EROSION BLOCKS

HOLLOW BRICKS

UNI PAVERS

KERB STONE - K9

RECTANGULAR PAVERS

RAW MATERIALS
PEA GRAVEL, CEMENT (OPC),
STONE CHIPS, STONE DUST, SAND.

VISION OF NRL ECO BRICKS

NRL ECO BRICKS ASPIRES TO PROVIDE YOU WITH INNOVATIVE, COST EFFECTIVE, QUALITY AND ECO-FRIENDLY BUILDING PRODUCTS THAT WILL FOSTER DEVELOPMENT OF THE COUNTRY AND THE INDUSTRY. ON ITS INCEPTION, WE BRING TO YOU INTERLOCKING HOLLOW AND SOLID BLOCK - A ONE OF A KIND BUILDING PRODUCT THAT WILL CHANGE THE CONVENTIONAL WAY OF CONSTRUCTION.

Orbed Green Energy Limited (OGEL)

Orbed Green Energy Limited (OGEL) is a premier renewable energy solutions provider and sister concern of RASS Associates Ltd. Founded with a core commitment to making clean energy accessible across Bangladesh, OGEL delivers end-to-end solar solutions spanning design, engineering, system integration, equipment supply, and long-term operations & maintenance.

Driven by expertise in energy management and project execution, OGEL empowers residential, commercial, and industrial clients to transition toward a low-carbon, sustainable future.

- **Vision:** A nation where every residence, educational institution, hospital, commercial center, and industrial facility harnesses clean, infinite solar energy for a sustainable tomorrow.
- **Mission:** To accelerate Bangladesh's energy transition through reliable, high-performance, and cost-effective solar technology.

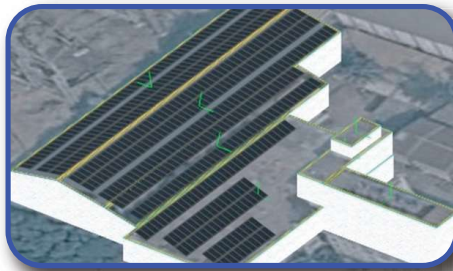

End-to-End Service Portfolio

- **Residential & Commercial Rooftop Solutions:** Turnkey rooftop solar installations designed to lower electricity overheads, enhance property value, and significantly decrease carbon footprints.
- **Industrial Utility Systems:** Large-scale solar engineering for commercial complexes and industrial plants, delivering power reliability and substantial long-term operational savings.
- **Custom Engineering & System Sizing:** Personalized technical consultation and system modeling to match specific energy demand profiles and maximize energy generation.
- **Versatile Configurations:** Seamless integration of On-Grid, Off-Grid, Hybrid, and Net-Metered solar power architectures tailored to location and grid availability.
- **Operations & Long-Term O&M:** Continuous technical support, preventative maintenance, and asset management to ensure peak efficiency across 25+ year equipment lifespans.

Equipment Import & Supply Capabilities

OGEL maintains a robust global supply chain, serving as a trusted importer and supplier of Tier-1 solar components:

- **Solar Modules:** High-efficiency panels optimized for high-temperature and tropical climates (Jinko Solar, LONGi, JA Solar, Trina).
- **Inverters:** Advanced Grid-Tied, Off-Grid, and Hybrid power conversion units.
- **Energy Storage Systems:** Deep-cycle, Lithium-ion (LiFePO₄), and industrial backup battery bank solutions.
- **Charge Controllers & Balance of System:** High-efficiency MPPT/PWM controllers, weather-resistant mounting structures (rooftop and ground-mount), solar cables, connectors, and protection gear.
